Modern Model of Care

PERSON-CENTERED

Plan care around the person’s needs, preferences and goals.

PREVENTION

Promote health, detect risk early and reduce avoidable complications.

INTEGRATED CARE

Coordinate services across virtual, primary, hospital and specialized care.

VALUE

Use evidence and resources responsibly while improving outcomes and experience.

Systems of Care

KEEP WELL

Prevention, health promotion and early risk reduction.

PLANNED CARE

Coordinated elective care with efficient pathways and recovery planning.

SAFE BIRTH

Care before pregnancy, maternity services, birth and neonatal follow-up.

URGENT CARE

Rapid access and coordinated response for urgent and emergency needs.

CHRONIC CARE

Screening, case coordination and continuing care for long-term conditions.

LAST PHASE

Supportive, palliative and hospice care for patients and families.

Model of Care Enablers

DIGITAL ACCESS

Virtual self-care, education, navigation and health hotline services.

PRIMARY AND HOME CARE

Enhanced primary care and home care services close to where people live.

REFERRAL NETWORKS

Integrated referral routes support continuity across levels of care.

PERSONAL HEALTH RECORDS

Connected information supports safer transitions and coordinated decisions.

GUIDELINES

National guidance reduces variation and supports evidence-based practice.

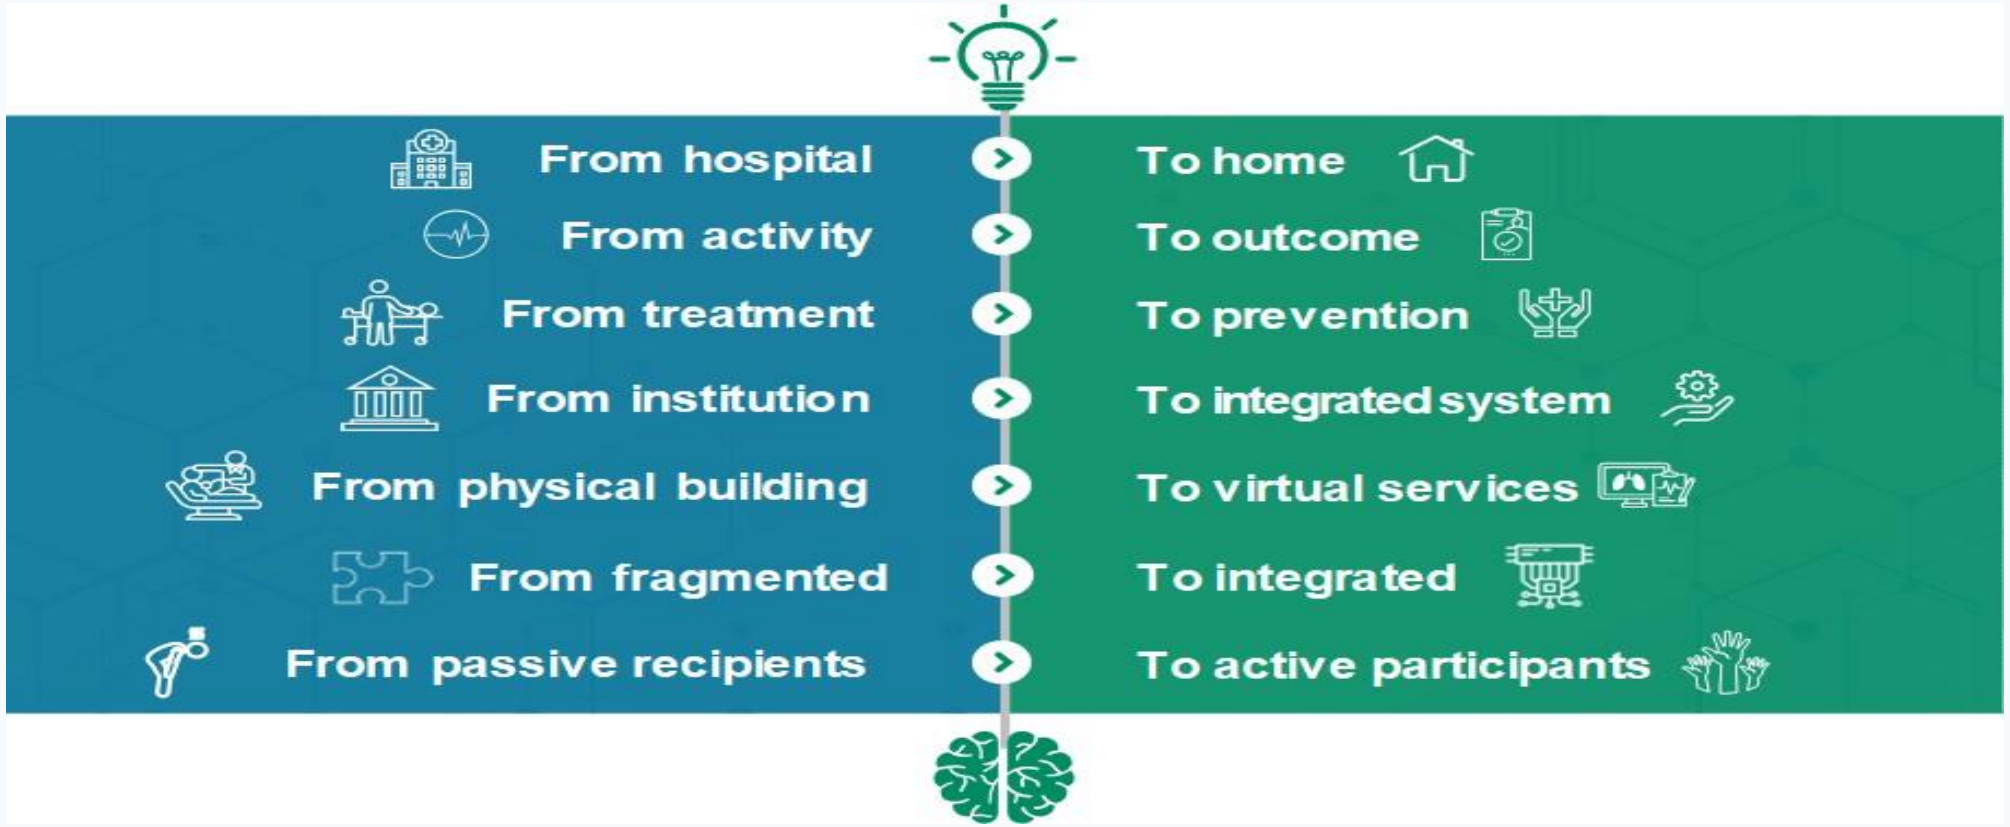

OUTCOMES

Systematic data collection and outcome monitoring guide improvement.
