Health Information Systems

ELECTRONIC HIS

Supports real-time documentation, orders, results, medication processes and shared access controls.

PAPER-BASED HIS

Requires complete, legible, dated and authenticated entries with secure record handling.

CONFIDENTIALITY

Access information only for assigned duties and protect it during viewing, communication and storage.

Use the approved system and follow downtime procedures whenever electronic access is unavailable.

Health Records and Clinical Documentation

- Use your own authorized account and protect login credentials.
- Document facts, assessment, decisions, actions and response to care promptly.
- Use approved abbreviations and complete required authentication or co-signature.
- Correct errors through the approved amendment process. Never delete or conceal information.
- Access only records required for your assigned clinical duties.
