SCFHS STANDARD: H.2

When an Incident Occurs

- Attend to the patient and call the responsible supervisor without delay.
- Preserve relevant information and document clinical facts accurately.
- Submit an incident report through the approved reporting channel.
- Do not assign blame, speculate or alter the health record.
- Medical error disclosure follows the institutional process and authorized clinical leadership.

Ask: Who leads disclosure in my department?

Disclosure of Medical Errors

STABILIZE

Address urgent clinical needs and reduce further risk.

NOTIFY

Inform the responsible supervisor and patient safety team promptly.

PREPARE

Confirm known facts and coordinate the disclosure plan with authorized leadership.

COMMUNICATE

Explain verified facts honestly, acknowledge the event and describe immediate actions.

SUPPORT

Allow questions and provide ongoing clinical and emotional support.

FOLLOW UP

Document care, complete reporting and share corrective actions through approved channels.
