Fire Safety and Evacuation

RECOGNIZE

Identify alarms, exits, assembly points and high-risk areas.

ACT

Follow the institutional fire response procedure and raise the alarm.

EVACUATE

Prioritize patient safety and use the designated evacuation route.

REPORT

Contact the internal emergency number and follow the incident command structure.

نوع الطفاية / نوع الحريق	مسحوق الجاف	CO_2	الرغوة	الماء
A Paper, Wood & Plastic	✓	✗	✓	✓
B Flammable & Combustible Liquids	✓	✓	✓	✗
C Electrical Equipment	✓	✓	✗	✗

Fire Response Essentials

RESCUE

Move anyone in immediate danger only when it is safe to do so.

ALARM

Activate the alarm and call the internal emergency number.

CONTAIN

Close doors and isolate the area when possible.

EVACUATE OR EXTINGUISH

Evacuate according to the plan. Use an extinguisher only if trained and conditions are safe.

Know the locations of exits, alarm points, extinguishers and the assembly area.

Safety Equipment

- Fire Extinguishers
- Fire Suppression Systems:
- Automatic Sprinkler System
- CO_2 Fire Suppression System
- FM-200 Fire Suppression System
- Fire Blankets
- Fire Alarm System
- Smoke Detectors and Sensors
- Emergency Eyewash Station
- Emergency Exits Compliant with Safety Requirements and Specifications

Types of Fire Suppression Systems

CO_2 Fire Suppression System
نظام ثاني أكسيد الكربون

FM-200 Fire Suppression System
FM-200 نظام

Automatic Sprinkler System
