Virtual Care: Principles and Ethics

IDENTITY AND CONSENT

Verify identity, location and consent before the encounter.

PRIVACY

Use approved platforms and a private environment.

CLINICAL SUITABILITY

Confirm that virtual care is appropriate for the patient's condition.

DOCUMENTATION

Record the encounter, limitations, advice and follow-up plan.

ESCALATION

Arrange in-person or emergency care when risk cannot be managed remotely.

BOUNDARIES

Maintain professionalism and avoid personal communication channels.
